Prompty do Midjourney – obrazki do okien wydarzeń

Realm of Thrones · prolog 298, okna ROT i Kronika Westeros (cała fabuła) · 21.10.2026

Jak używać. Każdy prompt wklejasz w całości do Midjourney. Na końcu już są parametry `--ar 16:9 --style raw --v 7` (panorama jak okno w grze). Przy każdej postaci z nazwy prompt mówi, że ma wyglądać jak w serialu HBO.

Wybór obrazka. Z czterech wyników weź ten bez błędów. Najczęstsze błędy AI: nogi koni (jeździec „zlany" z koniem), dłonie, twarze w tle, napisy na sztandarach. Jeśli wychodzi za dużo postaci albo konie się zlewają, skasuj w prompcie zdanie o postaciach w tle i wygeneruj jeszcze raz.

Spójność. Gdy któryś obrazek bardzo Ci się spodoba, możesz dodać do kolejnych `--sref <adres tego obrazka>` – cała seria będzie w jednym stylu.

Nazwy plików. Zapisz obrazek pod nazwą z tej listy (np. `prolog_04.png`, `rot_NedEvent_0.png`, `kronika_012a.png`) albo po prostu wrzuć do Pobranych i napisz mi numer – resztę zrobię ja: sprawdzę, zmniejszę do rozmiaru okna i włożę do moda (bez przebudowy).

Okna ROT. Twoje obrazki zastąpią obrazki ROT w jego oknach (33 z 35 – dwa okna Blackwater mają w ROT własny wygląd i ich nie podmienimy).

Kronika. Prompty są do wszystkich 117 wydarzeń z listy „Kronika Westeros v2" (osobny dokument). Rób najpierw te, które wybierzesz do zrobienia.
