Obrazki scen prologu 298 - prompty do generatora AI (wersja 3: realistycznie jak kadry z serialu)

Zasada Jeffa (21.10, 04:55): „to ma być ze świata Gry o Tron, widok miasta, Red Keep ... klimat obrazka bierzemy z serialu, a fabułę z książki". Każdy prompt jest pełny (styl jest już w środku), więc wklejasz go w całości.

Jak generować

- **Format:** poziomo 16:9, najlepiej 1920 × 1080.
- **Nazwy plików:** prolog_01.png ... prolog_23.png. Wrzuć je w czacie albo do C:\Users\GAME\Bannerlor2-Realm-of-Thrones\assets\prolog.
- **Realizm jak w serialu:** każdy prompt kończy się opisem zdjęcia filmowego: kamera ARRI Alexa, prawdziwe plenery, ziarno filmu, faktura skóry i błota oraz zakaz malarskiego i komputerowego wyglądu.
- **Midjourney:** dopisz na końcu `--ar 16:9 --style raw --v 7`. W ChatGPT, DALL-E, Flux i Leonardo wystarczy sam tekst; w Leonardo wybierz model fotorealistyczny.
- **Jeśli generator nie przyjmuje słów „HBO" albo „Game of Thrones":** zamień „from HBO's Game of Thrones" na „from a big-budget medieval fantasy TV series". Nazwy miejsc i postaci (Red Keep, Winterfell, Eddard Stark) zostaw.
- **Twarze:** prompty nie wymieniają nazwisk aktorów (prawa do wizerunku). Opisują wygląd postaci tak, jak wyglądają w serialu.

Wspólny styl (jest już w każdym prompcie):
